

CONNECTING 4 JUSTICE INTERNATIONAL  
SILENT VICTIMS OF CRIME

# Collaboration *at Sea*

An immersive, funding-focused expedition for the executive directors, program officers, board leaders, and funders building a better system for children, youth, and families touched by criminal justice.

Collaboration at Sea is the most ambitious convening to date – an expedition designed to move the field beyond the typical conference format. Over five days at sea, participants join a living, breathing community of practice, where the conversations that matter most happen at the dinner table, out on the deck, and in the workshop room – free of the distractions that pull people away from organizational life.

Set sail on a round-trip voyage from Fort Lauderdale to Nassau, Bahamas and CocoCay Private Island, this collaborative brings together direct-service leaders, funders, researchers, and lived-experience advocates for structured working sessions, shared meals, and the kind of relationship-building that shapes real, funded partnerships.

*“The conversations that matter most happen at the dinner table, on the deck, and in the workshop room.”*
